Solid Color Stain™

BEAUTIFY & REVITALIZE

Solid Color Stain™ is an opaque water-based, premium quality concrete color stain used to restore previously colored surfaces or to rejuvenate old, tired-looking concrete by completely covering discolorations or stains. Solid Color Stain can be used on concrete flatwork, vertical surfaces, concrete blocks, pavers, imprinted concrete, exposed aggregate, and many other cementitious surfaces. It can also be used with sandblasting stencils. It's perfect for use over micro-toppings and overlays.

Features & Benefits:

- Opaque finish completely covers discolorations
- Premium water-based, modified-polymer formula
- Easily applied with a NewLook Applicator Brush
- Non-reactive, non-acrylic based
- Match any color
- No VOCs, environmentally friendly
- Compatible with virtually any sealer

Colors & Packaging:

- Available in 80 standard colors
- Multi-component kit mixed with clean tap water

Working Tips & Keys to Success:

Solid Color Stain's can be tinted or enhanced using the Translucent Color Enhancer™ or Designer Series Enhancer™. Sealing Solid Color Stain compromises the maintainability of the stained surface. Do not seal when possible. If necessary, use™ Concrete Maintenance Sealer™ or Co-Lock Sealer™.

- Thoroughly prepare concrete surface by pressure washing
- Remove and clean sealers and soil from surface before staining
- Mix all components thoroughly
- Re-broom and backbrush Solid Color Stain until dry to touch to achieve desired opacity
- Always produce job site samples
